

**Mel
Rosenberg**

In 1991 he organized a session at IADR in Mexico on bad breath, followed by the first international meeting on bad breath in Israel in 1993. Together with Daniel van Steenberghe he formed ISBOR in 1995. Together with Anton Amann he founded the Journal of Breath Research and served with him as co-editor in chief. He has co-written a book with Nir Sterer on bad breath.

**Romain
Dubreuil**

Romain obtained his master engineering degree in 2011 specialized in biotechnology from ESPCI ParisTech. Then, during 3 years, he gained a strong technical expertise on implanted cardiac medical devices both as technical engineer and then as project manager to develop new algorithms. He joined Aryballe in 2015 and worked in applied research for medical application and laboratory instrumentation. Recently, he moved into product development and acquired strong knowledge on global device integration.

**Vaughan
Langford**

Vaughan joined Syft Technologies in 2002 after completing his PhD in Physical Chemistry at the University of Canterbury, New Zealand, and post-doctoral fellowships at the Universities of Geneva, Western Australia, and Canterbury. With an extensive background in diverse applications of SIFT-MS, he provides advanced applications training and support to SIFT-MS users globally.
